

Wedding Cake Cutting Guide

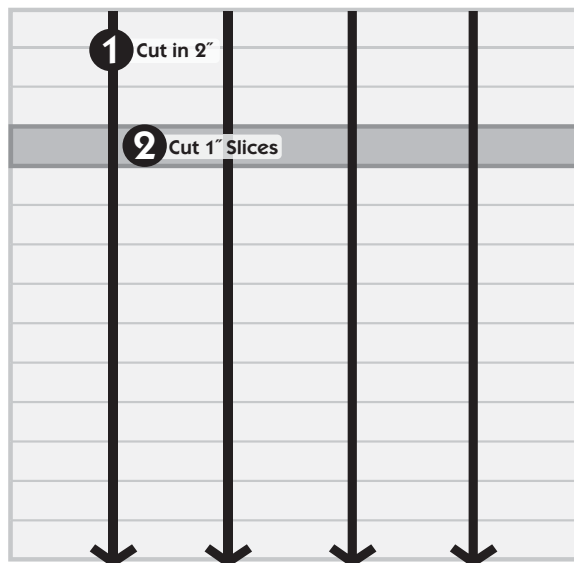

Remove the Top Tier First

Traditionally, the top tier is saved for the first anniversary. Remove it first and begin cutting the cake with the second tier down until you reach the bottom of the cake.

Round Cakes

- 1) Move in 2 inches from outer edge and cut a circle.
- 2) Cut 1-inch slices around the outer edge.
Repeat 1 & 2 until you reach center of cake.
- 3) Divide center in half, 4ths, 6ths, or 8ths (depending on size.)

Square Cakes

- 1) Move in 2 inches from outer edge and cut.
- 2) Cut 1-inch slices along outer edge.
Repeat until done with tier/cake.
